CLEANING NON-WHIRLPOOL FOOT BASINS AND TUBS (980.3)

A "non-whirlpool foot basin" or "tub" is any basin, tub, footbath, sink or bowl, as well as all non-electrical equipment that holds water for a client's feet during a pedicure service.

Steps to follow after each client:

1. **Drain** the basin or tub of *all water*.
2. **Scrub** the inside walls of the basin or tub and clean *all visible* debris with a clean brush, liquid soap (labeled as such) and water.
3. **Rinse** the basin or tub with clean water.
4. **Refill** the basin with clean water.
5. **Add disinfectant.** Refer to the manufacturer's label to determine how much disinfectant to use. Remember that the disinfectant must be an *EPA-registered, hospital-quality liquid disinfectant* that is labeled as a bactericide, fungicide and virucide.
6. **Leave the disinfectant in the basin or tub for at least 10 minutes.**
7. **Drain** and rinse the basin or tub with clean water.
8. **Wipe** the basin or tub dry with a new, clean paper towel.
9. **Record this procedure in the pedicure-cleaning log.** The log should indicate the date and time of each cleaning, the initials of the person who completed the procedure, and that the cleaning was done after a client. The log shall be made available to either a client or a board representative upon request.

Note: End of day and weekly cleaning are not required for Non-Whirlpool Foot Basin and Tubs.
